ABSTRACT

RAMBUTAN WAREHOUSE

Rambutan Warehouse is an online platform designed to streamline the sale and distribution of rambutan fruits and related products. The system caters to four primary user roles: farmers, wholesale fresh rambutan buyers, administrators, and normal buyers.

User Roles

- **Farmers**:

  - List product.

  - Manage inventory.

  - Track sales.

- **Wholesale Fresh Rambutan Buyers**:

  - Place bulk orders.

  - Negotiate prices.

  - Schedule deliveries.

- **Administrators**:

  - Oversee platform operations.

  - Ensure smooth transactions.

  - Resolve issues.

DEPARTMENT OF COMPUTER APPLICATIONS

- **Normal Buyers**:

  o   Access a variety of rambutan products.

  o   Purchase fresh fruit and processed goods directly.

- **Frontend Development**:

  o   Technologies used: HTML, CSS.
  o   Features: User-friendly and responsive interface.

- **Backend Development**:
  o   Technology used: Django.
  o   Features: Robust and efficient management of data and processes.

- **Database**: SQLite is used.

- **Objective**:
  o   Provide a seamless experience for all users.
  o   Promote the growth and distribution of rambutan produce.
